

Imperial Clock Company

Granite City, Illinois

THE CLOCK herewith illustrated fills a long felt want. It was designed to meet the constant demand for a large SELF-WINDING CLOCK at a moderate price. As it is provided with a long pendulum it follows that it is a more accurate time piece, being provided with a large glass front and as they require no winding they are well adapted for advertising purpose.

A plan which has been adopted by many wide-awake merchants; is to place a number of them in a town to advertise their business or they may rent the advertising space and, in this manner, reap a handsome income.

No 6

DIMENSIONS

26 in. long; 10 1-2 in. wide, 4 1-2 in. deep, 8 in. dial.

Mission or Natural Oak Finish

THIS Self-Winding Clock can be used in the home and in the office as well. Small enough to be hung anywhere and having a general appearance that harmonizes well with late designs of furniture. A neat little clock for the price.

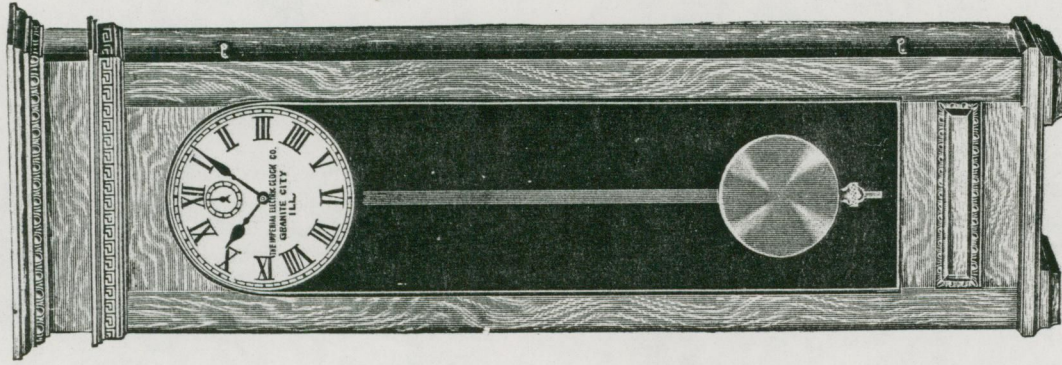

It is operated with a battery of two dry cells which can be replaced by anyone, without any experience. One battery will run a clock about a year or longer.

No. 5
DIMENSIONS

18 1/2 in. long; 6 1/2 in. wide; 4 1/2 in. deep; 8 in. dial.

Mission or Natural Oak Finish.

THIS Self Winding Clock is not only used as a timekeeper but also as an advertising novelty. It unfolds the mystery of the self-winding clock. Open on all sides to permit anyone to see how it works. The movement is so constructed that it will stand a long exposure to dust without injury. Jewelers or merchants will find it profitable to place one of them in their window as an attraction.

Mechanics as well as amateurs have found this clock very interesting. It is operated with a battery of two dry cells which can be replaced by anyone, without any experience. One battery will run the clock about a year or longer.
